We are members of "the Woodman organization" which is an organization focused on countryside sojourns and based on its own training-educational system. The organization unites persons interested in its untraditional conception: harsh, adventurous and even technically focused countryside training. It takes up free time of not just children, but even adults and teenagers."1st Woodman Organization České Budějovice"was established on 3 May in 1990 due to a merger among former Pioneer Organizations: "Orion", "Ztracená stopa" ("Lost trace"), "Myšáci" ("Mice") and "Stopaři" ("Trackers"). Nowadays it merges five children's clubs: "Vlčata" ("Wolf cubs"), "Strážci" ("Guardians"), "Ztracená stopa" ("Lost trace"), "Kamzík" ("Chamois") and "Práčata" (the youngest club). Furthermore, there is also one adult club focused on Indian's theme: "Lidé života" ("The people of life")/"Wičoni oyáte". The all-year-round club work comprises both regular meetings in the clubroom, and weekend expeditions in the countryside. Every year we organize a summer camp which represents the annual club work. The camp takes place in Nesměň (on our permanent basis).

We are a children's touristic group. For over a quarter a century, we teach children how to protect and live in nature. Children learn about real human rules and values; they can find real friendships here. We encourage their competitiveness in the spirit of "fair play". The group members learn about nature, basic types of knots, Morse code, and the first aid. There are both boys and girls from 7 to 18 years old. Among others, we also try to harmonize the relationships among these different age groups. We meet in the Lanna's boathouse from 16.30 to 18.30 every week. Once a moth, we organize a weekend trip to the countryside, where we play games and develop our skills.
Every summer, there is a fourteen-day-long summer camp in our campsite that is situated close to Velešín. We sleep in tents. Every year, there is a different game. We become Indians, sailors, knights or pirates. There are some favorite additional actions such as the "Eyelid game", the "Halloween night", the "Devil's meeting", the "Hedgehog game", skating, cooking, weekend trips (the "Christmas trip", the "Corn trip", the "Easter trip", the "Dragon trip" etc.) and the "72 hours project".

The club was founded for the development support of the after-school activities of children and teen-agers from Písek and its surroundings. Its original target was to get children and teen-agers out of computers, TVs and mobile phones, to put them up from their chairs and to make conditions for healthy exercising, to replace communication via social networks with meetings in person, to create conditions for entertaining leisure activities, to offer them a space where they can meet in the afternoons and in the evenings, a space, that can assure parents that their child is out of pathogenic milieu, to support their sense of competitiveness, team spirit, strategic thinking etc. Now, after the first year, we can say we managed.

Our activities:

We organize regular groups for children (5 - 15 years) during the school year and the open club with the irregular attendance. The groups focus on the Laser Game, and we also make e. g. LARP weapons, we play table tennis, pool, air-hockey, we race… Our regular meetings have an educational character, too (we speak of history at LARP and of equipment and setting of PC games, programming, operation of laser etc.). During the holidays the club organizes morning groups for children who are home alone, and city camps with various topics, both in Laser Arena and outdoor (in the afternoons). As a citizens' association we organize or participate in various events for public at Laser Arena or outdoor (children's day, Laser Tag Tournament, events for mothers with young children, family pentathlons, ladies' club etc.). Since 2015 we have also had the Laser Arena in the square in Galerie Dvořák in České Budějovice. We have created there a club mainly for students, but from September 2015 there will be also groups for children who like rollicking. Other children's groups were offered an opportunity to come and spice their program up with Laser Game. This opportunity is usually used within their trips to Písek. Our Laser Boys can arrive in a camp to meet children since the coming holidays, too. As we want to keep our focus extensive, handicapped children and adults are welcome in Laser Arena, too. It is barrier-free and adapted to everyone.

We offer an alternative to preschool education for children aged 3 to 6 years. We work according to the concept of forest nurseries. This mainly means outdoor stay in any weather, small group of children of different ages, the respectful approach of our teachers and active cooperation with parents. The pedagogical concept is based on the Framework Educational Program for Preschool Education and it is designed to naturally build on the changing seasons, which children can perceive with all their senses when exploring nature. Teachers are in the roles of guides who accompany children to their daily adventures in the forest where they help children to understand the laws of nature and lead them to cooperate with each other and at the same time leave room for the individuality of each child, which is only possible in smaller groups of children. We also organize a summer city camp for children.

We educate them in the spirit of Christian values and help them in difficult life situations. Our goal is to support them on their way to become independent and contented human beings ready for the future. We offer a safe space for all children and teenagers aged 3 - 26 years. All our programs are offered to all children and youths regardless of their skin colour, religion or social status. In our work we build on the pedagogical and educational legacy of Jan Bosko, who developed a preventive-educational system. The Music School Vojtěch o.p.s. was established in October in 2012. It continues a four-year-long musical education of children in the parish of Saint Vojtěch. Currently, forty children from the age of three to twelve attend a regular individual and group tuition that is focused on the development of their musical and choral abilities. The main aim is to look after musical abilities of children in general. We also focus on the education of future chorus singers for the Parish Chorus of Saint Vojtěch and the South Bohemian Region. There is a call for a chorus which could well cooperate with the South Bohemian Chamber Philharmonic on the occasion of the realization of instrumentally vocal pieces of music. Based on the examples from advanced European countries, this type of care is very important.
The school attendees have already appeared in several concerts in public in the church of Saint Vojtěch in Ceske Budejovice. The headmaster of the school is a good-experienced teacher and conductor. He has a long-term praxis (Basic School of Arts, Conservatoire). There is also a qualified young teacher of singing.
